The Benefits of Massage

Bodywork Goes Beyond Relaxation

As you lie on the table under crisp, fresh sheets, hushed music draws you into the moment. The smell of sage fills the air and you hear the gentle sound of massage oil being warmed in your therapist's hands. Once the session gets underway, the daily stressors and aching muscles fade into an oblivious 60 minutes of relief, and all you can comprehend right now is not wanting it to end.

But what if that hour of massage did more for you than just take the pressures of the day away? What if that gentle, Swedish massage helped you combat cancer? What if bodywork helped you recover from a strained hamstring in half the time? What if your sleep,

cultures. Touching is a natural human reaction to pain and stress, and for conveying compassion and support. When you bump your head or have a sore calf, the natural response is to rub it to feel better. The same was true of our earliest ancestors.

Healers throughout time and throughout the world have instinctually and independently developed a wide range of therapeutic techniques using touch. Many are still in use today, and with good reason. We now have scientific proof of the benefits of massage -- benefits ranging from treating chronic diseases and injuries to alleviating the growing tensions of our modern lifestyles. Having a massage does more

Along with easing stress -- the No. 1 cause of disease -- massage has a long list of benefits.

digestion, and mood all improved with massage and bodywork? What if these weren't just "what if's"?

Evidence is showing that the more massage you can allow yourself, the better you'll feel. Here's why:

Massage as a healing tool has been around for thousands of years in many

than just relax your body and mind -- there are specific physiological and psychological changes that occur, and even more so when massage is utilized as a preventative, frequent therapy and not simply mere luxury. Massage not only feels good, but it can cure what ails you.

The Fallout of Stress

Experts estimate that 80 percent to 90 percent of disease is stress-related. Massage and bodywork is there to combat that frightening number by helping us remember what it means to relax. The physical changes massage brings to your body can have a positive effect in many areas of your life. Besides increasing relaxation and decreasing anxiety, massage lowers blood pressure, increases circulation, improves injury recovery, encourages deep sleep, and increases concentration. It reduces fatigue and gives you more energy to handle stressful situations.

Massage is a perfect elixir for good health, but it can also provide an integration of body and mind. By producing a meditative state or heightened awareness of the present moment, massage can provide emotional and spiritual balance, bringing with it true relaxation and peace.

The incredible benefits of massage are doubly powerful if taken in regular "doses." Researchers from the Touch Research Institute (TRI) at the University of Miami, found that recipients of massage can benefit even in small doses (15 minutes of chair massage or a half-hour table session). They also note that receiving bodywork two to three times a week is even more beneficial. While this may not be feasible, it's nice to know that this "medicine" only gets better with frequency.

What It Does

In an age of technical and, at times, impersonal medicine, massage offers a drug-free, non-invasive, and humanistic approach based on the body's natural ability to heal itself. Following is a brief list of the many known, research-based benefits of massage and bodywork:

- Increases circulation, allowing the body to pump more oxygen and nutrients into tissues and vital organs;
- Stimulates the flow of lymph, the body's natural defense system, against

toxic invaders. For example, in breast cancer patients, massage has been shown to increase the cells that fight cancer. Furthermore, increased circulation of blood and lymph systems improves the condition of the body's largest organ -- the skin;

- Relaxes and softens injured and overused muscles;
- Reduces spasms and cramping;
- Increases joint flexibility;
- Reduces recovery time and helps prepare the body for strenuous workouts, reducing subsequent muscle pain of athletes at any level;
- Releases endorphins -- the body's natural painkiller -- and is proving very beneficial in patients with chronic illness, injury, and post-op pain;

- Reduces post-surgery adhesions and edema and can be used to reduce and realign scar tissue after healing has occurred;

- Improves range-of-motion and decreases discomfort for patients with low back pain;

- Relieves pain for migraine sufferers and decreases the need for medication;

- Provides exercise and stretching for atrophied muscles and reduces shortening of the muscles for those with restricted range of motion;

- Assists with shorter labor for expectant mothers, as well as reduces the need for medication, eases postpartum depression and anxiety, and contributes to a shorter hospital stay.

Drinking plenty of water after a massage is important for helping wash toxins from the body.

The Health Benefits of Ginger

Easing Nausea, Joint Pain, and Allergies

This pungent spice is found in cuisine around the globe, but ginger has also been used for more than 2,500 years for its medicinal properties. The ancient Chinese knew that it aided in the absorption of many herbal preparations and they prescribed it extensively as a digestive tonic.

A native root of southeast Asia, ginger is a potent ally in the treatment of nausea, motion sickness, and joint pain. Current research confirms ginger's efficacy as an anti-inflammatory, GI calmative, and antihistamine. The active ingredients found in ginger -- gingerols and shogaols -- lower levels of prostaglandins, the chemicals responsible for pain and inflammation in joints and muscles. By reducing prostaglandins, ginger can even have a positive effect on heart health and circulation because chronic, systemic inflammation increases the risk of heart attack and blood vessel compromise.

Ginger comes in several forms. Fresh and dried ginger is available in

supermarkets for use in cooking. It's also available in capsules, an extract pill form, prepackaged tea bags, crystallized, and as a topical oil.

Recommended Uses

MOTION SICKNESS AND NAUSEA

Most medications for nausea and motion sickness work to calm the nervous system and can cause drowsiness and dry mouth. On the other hand, ginger calms the digestive tract directly and has been shown to reduce nausea after surgery and chemotherapy. For motion sickness, take 100 mg two hours before departure and every four hours afterwards or as needed.

ARTHRITIS AND MUSCLE ACHES

Massage ginger oil into affected areas and/or take up to 1 g of powdered ginger daily to reduce inflammation.

COLDS AND ALLERGIES

Drink up to 4 cups of ginger tea daily or enjoy authentic ginger ale (made from real ginger).

The ginger plant has many medicinal uses.

The Scoop on Meditation

A Simple Practice with Profound Benefits

People who meditate regularly appear internally and externally five to 10 years younger than their non-meditating peers, according to author Deepak Chopra. That's good news for the estimated 10 million people who practice meditation on an ongoing basis and experience the resulting calm it cultivates.

The rich benefits come from doing something that looks like nothing: Sitting still, being quiet, and breathing deeply. Meditation works simply but profoundly by defusing the onslaughts of life -- a racing mind, busyness, deadlines, commutes, all of which have physiological effects on well-being. Meditation calms the nervous system, decreases metabolic rate, heart rate, and

blood pressure, and lowers levels of cholesterol, stress hormones, and free radicals. It also has a direct effect on breathing, slowing and deepening respiration so more oxygen circulates throughout the body. Not only that, meditation is said to lessen feelings of anxiety and depression and improve memory and concentration. And all of this culminates in slowing the aging process, as Chopra notes.

There are many meditation techniques, including focusing on a mantra, a sacred word or phrase, or your breath. But the basic intent of all meditation is focus and attention. And it doesn't take hours a day in an ashram to meditate effectively. Benefits kick in with even a short period of devoted time.

How to begin? Wear comfortable, unrestrictive clothes, sit on a cushion or chair with your back straight (think once again, comfort), rest your hands on your legs, let your eyes go soft and out of focus or close them, breathe slowly and deeply, and -- the hardest part -- attempt to empty your mind of thoughts and quiet the internal dialogue. When thoughts flit through your mind, let them pass without judging them and come back to your focus (your mantra, counting, etc.) and breathing.

Start with this sitting meditation technique for five minutes a day, and add on time as you get more at ease with the process. For more information on techniques and benefits, check out www.abc-of-meditation.com.

Greetings from A Joyful Awakening!

Polarity Therapy Supports Your Most Vibrant Life!

Are you feeling stuck? Are you having difficulty harnessing the motivation you need to fulfill the life that you truly desire? Do you want to live your life more fully and with greater ease, enthusiasm and joy? Through energy system balancing, Polarity Therapy can help to strengthen your clarity, inner power and confidence so that you can turn your inspirations into action and create a life that fully supports your highest well being. Once you have experienced this work, you will understand how powerful and wonderful it really is!

VALENTINE'S DAY is a wonderful time to show our love by giving the gift of healing touch, especially to our loved ones in need of TLC!

To order Gift Certificates for Holistic Massage or Polarity Therapy, please call (978)387-2854 Monday-Friday during normal business hours.
